DETAILED ACTION

Election/Restrictions

1. A telephone call was made to Mark Superko on 23 May 2005 regarding the restriction requirement, but did not result in an election being made.
2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-8, 9-11, and 12-14, drawn to a method of conducting electronic commerce including placing an order and converting a sub tier order to an approved order, classified in class 705, subclass 26.
 - II. Claims 15-18, 19-23, and 24, drawn to and method and apparatus of processing an order, classified in class 705, subclass 26.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as processing the order created by a non-authorized individual, which is not required for invention I. See MPEP § 806.05(d). Invention I has separate utility such as identifying items on a web site and holding the order for approval, which is not required in invention II. See MPEP § 806.05(d).
4. Because these inventions are distinct for the reasons given above and the search required for Group 2 is not required for Group 1, restriction for examination purposes as indicated is proper.

Art Unit: 3625

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
